EDUCATION

Chiang Rai Rajabhat University

B.Sc.(information technology).(In porgress),

Faculty of Digital Technology

2564 - Precent | GPA 3.44

SKILL AND TOOLS

Stack & Programing

- HTML
- CSS
- JavaScript
- PHP
- C#
- Java
- SQL

Framework & DB & Library

- Bootstrap
- Tailwind
- MUI
- Chakra UI
- React
- Laravel
- SQL Server
- MySQL
- NodeJS

Tools & Other

- VS Code
- Git
- NetBeans
- Photoshop
- Figma
- AI Prompter

ABOUT ME

My name is Arthit LungYa, nicknamed Arthit. I am a 23-year-old student in the Information Technology program at Chiang Rai Rajabhat University, currently in my third year.

I am writing to express my interest in finding an internship opportunity as a Full-Stack Developer or Programmer. I am looking for a 2-month internship to gain practical skills, earn co-op hours, and build my professional experience.

I am highly motivated and eager to learn new things. I am confident that I can contribute to your team and make a positive impact.

EXPERIENCE AND PROJECTS

Restaurant Management System Program 2565

https://github.com/ArthitDev/Basic-Restaurant-System

Year 2 This restaurant management system is written in C# using the .NET framework and utilizes a SQL Server database. The system allows for table reservation and food ordering, as well as management of food items, employee information, and food categories. Order processing and bill generation are also supported. The system provides summary reports for each data category. In this project, I was responsible for coding the algorithms and logic of the system.

Voting and Comment Game Website 2566

https://github.com/ArthitDev/React-Games-Project

Year 3 The website displays comments about games and allows users to rate the Front-End. Users can register and log in, with a Back-End system for Admin to manage membership and login data. Registration and login information is stored in Local Storage. The development is done using React and the Chakra UI framework, implementing CRUD operations through PHP API.

Three Seasons Flowers Website 2566

https://github.com/ArthitDev/Laravel-Flower-Project

Year 3 The website displays information about flowers across the three seasons, allowing users to come and read for additional knowledge about flowers specific to each season. It is developed using Laravel and Tailwind, featuring Front-End presentation and Back-End management for login and registration. Blade Template is utilized for seamless integration and functionality.
